

simple_viz — recording cue card

One page. Glance, don't read. Full wording is in `VIDEO\_SCRIPT.md`.

Before recording: venv active, inside `Comms\_Data\_Science`, story GIF

already open in a browser tab, PyPI page open in another tab

(<https://pypi.org/project/simple-viz-prashasti/>), `pip install -e ".[dev]"` done once.

```
| # | Cue | Show / run |
| --- | --- | --- |
| 1 | Motion hook — "global audience, not global revenue" | play `simple_viz_story.gif`
(browser) |
| 2 | Whole story — "all on one page" | `open examples/simple_viz_poster.png` |
| 3 | Real package — src / data / tests / README | `ls src/simple_viz data tests examples` |
| 4 | Code + data — small funcs, real CSVs | `open src/simple_viz/core.py` · `open
data/pinterest_revenue.csv` |
| 5 | Published on PyPI — show live page, then install | browser: pypi.org/project/simple-
viz-prashasti · `pip install simple-viz-prashasti` · `python -c "import simple_viz;
print(simple_viz.__all__)"` |
| 6 | Tested — "9 tests, all pass" | `python -m pytest -q` |
| 7 | README — install / usage / function table | scroll `README.md` |
| 8 | Fav chart 1: growth_line — zero base, takeaway title, 2021 annotation | `open
examples/simple_viz_02_growth_line.png` |
| 9 | Fav chart 2: share_gap — 58% users / 7% revenue, one red bar, direct labels | `open
examples/simple_viz_04_share_gap.png` |
| 10 | Meaning — revenue ~4× vs users <2×; US user ≈ 35× RoW; grow Europe | `open
examples/simple_viz_05_revenue_per_user.png` |
| 11 | Problem 1 — `twine upload` → 403 Forbidden; typed `__token__` instead of the real
`pypi-` token → made a real token → upload succeeded | show terminal error + `View at:` success
|
| 12 | Problem 2 — `ModuleNotFoundError` / "not a Python project"; wrong folder + env → `cd`
in, activate venv, `pip install -e .` | show error, then the fix works |
| 13 | Close — "global users, domestic revenue" | (optional) `git log --oneline -8` |
```

Numbers: users 335M→619M (+12%); revenue \$1.14B→\$4.22B (+16%);

Q4 by region — US&Canada 105M/\$979M · Europe 158M/\$245M · RoW 356M/\$96M.

After recording: Zoom cloud → passcode OFF → test link in incognito →
paste in Website URL. Due Fri Jul 31, 11:59 PM PDT.
